## CANNABINOID PROFILE

| Compound                                     | LOQ (%) | Result (%) | Result (mg/g) |
|--|---------|------------|---------------|
| Delta 9-Tetrahydrocannabinolic acid (THCA-A) |         |            |               |
| Delta 9-Tetrahydrocannabinolic (Delta 9THC)  |         |            |               |
| Cannabidiolic acid (CBDA)                    |         |            |               |
| Cannabidiol (CBD)                            |         |            |               |
| Delta 8-Tetrahydrocannabinol (Delta 8THC)    |         |            |               |
| Cannabinolic Acid (CBNA)                     |         |            |               |
| Cannabinol (CBN)                             |         |            |               |
| Cannabigerolic acid (CBGA)                   |         |            |               |
| Cannabigerol (CBG)                           |         |            |               |
| Tetrahydrocannabivarinic Acid (THCVA)        |         |            |               |
| Tetrahydrocannabivarin (THCV)                |         |            |               |
| Cannabidivarinic Acid (CBDVA)                |         |            |               |
| Cannabidivarin (CBDV)                        |         |            |               |
| Cannabichromenic Acid (CBCA)                 |         |            |               |
| Cannabichromene (CBC)                        |         |            |               |
|  |         |            |               |
| Total Cannabinoids                           |         |            |               |
| Total Potential THC**                        |         |            |               |
| Total Potential CBD**                        |         |            |               |
| NOTES:                                       |         |            |               |

% = % (w/w) = Percent (Weight of Analyte / Weight of Product)
\* Total Cannabinoids result reflects the absolute sum of all cannabinoids detected.
\*\* Total Potential THC/CBD is calculated using the following formulas to take into account the loss of a carboxyl group during decarboxylation step.

Total THC = THC + (THCa \*(0.877)) and Total CBD = CBD + (CBDa \*(0.877))

PREPARED & APPROVED BY/DATE

Testing results are based solely upon the sample submitted to SporoBio, LLC, in the condition it was received. SporoBio, LLC warrants that all analytical work is conducted professionally in accordance with all applicable standard laboratory practices using validated methods. Data was generated using an unbroken chain of comparison to NIST traceable Reference Standards and Certified Reference Materials. This report may not be reproduced, except in full, without the written approval of SporoBio, LLC.

## **RESIDUAL SOLVENTS**

| Solvent                       | Reportable Range (ppm) | Result (ppm) |
|-------------------------------|------------------------|--------------|
| Propane                       |                        |              |
| Butanes (Isobutane, n-Butane) |                        |              |
| Pentane                       |                        |              |
| Ethanol                       |                        |              |
| Acetone                       |                        |              |
| Isopropyl Alcohol             |                        |              |
| Hexane                        |                        |              |
| Benzene                       |                        |              |
| Heptanes                      |                        |              |
| Toluene                       |                        |              |
| Xylenes (m,p,o-Xylenes)       |                        |              |
